This invention is related to the preparation of hydrofluorocarbons (HFCs). Specifically, it relates to the fluorination of a compound of the formula: $\text{CF}_y\text{Cl}_3-\text{yCH}_2\text{CHFwCl}_2-\text{w}$ wherein $w = 0$ or 1 , and $y = 0 - 3$, with hydrogen fluoride in the presence of a fluorination catalyst under conditions sufficient to produce a compound of the formula: $\text{CF}_3\text{CH}_2\text{CF}_2\text{H}$. $\text{CF}_3\text{CH}_2\text{CF}_2\text{H}$ or HFC 245fa may be used as a blowing agent, a propellant, and a heat transfer agent.
